holidays!**

Free programming course at the National Museum of Science and Technology during the school holidays

Hi! It's time to sign up for a programming course at the National Museum of Science and Technology for the school holidays. The course is free if you took part in the Maker Tour – Programming project at school, and we will even arrange transport to and from the museum, also free of charge.

Are you interested in programming? You bet! Sign up for a course and learn even more about programming in a fun, creative way. The course is designed for pupils aged 10 to 12. Hours 10:00 to 15:00 at the museum. A bus will pick you up near school.

How to sign up:

1. Take this sheet home with you.
2. Ask a parent to apply by sending an email to jeanette.sandberg@tekniskamuseet.se, or via your class mentor. The parent must provide his or her name and mobile telephone number together with your name, age, school and any allergies you may have.

Remember!

There's only a limited number of places to the programming courses.

We're looking forward to your application!

/ Best wishes from the educators at the National Museum of Science and Technology

School holiday courses, 2019

- Winter sports holiday course: week 9
- Easter holiday course: week 16

**Take this sheet
with you and
show them
at home!**
